

Cyber Security Compliance is very important to map relevant regulations and is critical component for day to day operations. Many organizations follows the checklist based excel tool to map relevant audit and risk parameters and track the compliance level of the organization.

To mitigate the need and automate the business cyber security compliance, Whitehats Cybertech has come up with CCaaS (Cyber Compliance As a Service) model with inbuilt ISO 27001:2013 and PCIDSS Compliance. The model also offers clients the flexibility to perform Control testing using Control testing application.

Accessible over VPN and as a Cloud Service model, it ensures, the regular updates of the software's are available at all times while client can focus on running their operations.

Key features of the Compliance Foresight

Compliance Foresight

VPN Access Cloud Model as a Service

Module Wise License

ISO Compliance, PCI Compliance

Control Testing Applications

Features Rich Dashboards

Workflow Enabled

Predesigned Reports and Dashboards

Compliance Foresight as a Service Model

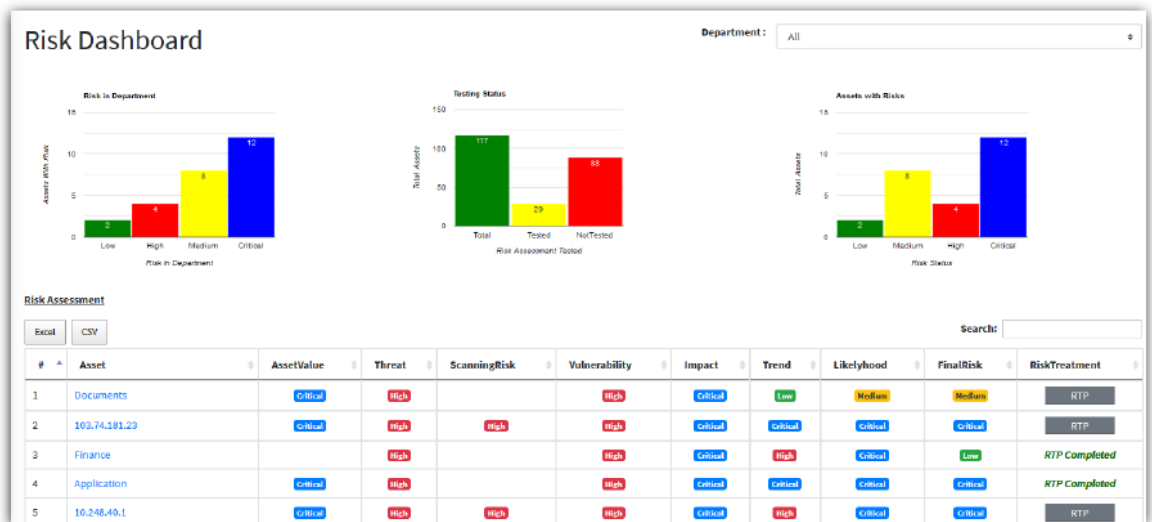

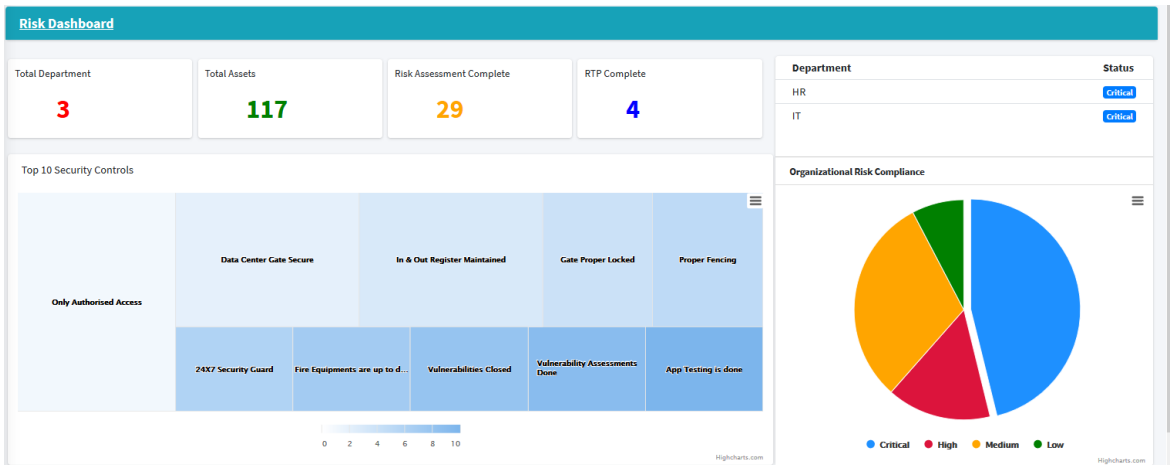

Risk Management is the key component for any organization to identify and mitigate threats. Due to increasing and complex business process and integration with multiple tools, processes, and ever increasing regulatory compliance requirements, regular risk assessments and risk management is inherent to any organization. Definition of Risks can vary from organization to organization and can have multiple business needs to address the risks.

While maintaining the Enterprise Risk Management (ERM) program it is critical to identify the risk at all levels and perform both automated and manual questionnaire based risk assessments to ensure no unwanted questions are left out.

Compliance Foresight Risk Management offers both Automated risk assessments and Questionnaire based risk assessments that can help organizations manage the Risk management program effectively.

Any organization has major requirement of audit report fully automated and reduce task for multiple changes. Fully compliant report writing is an area where Compliance Foresight specially focuses to map all required compliance parameters and generate detailed word and pdf report so that customer can focus on operations while keeping consistent reports across the operations.
